### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 01 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a CDMA transmitter, classified in class 375, subclass 146.
- II. Claims 10-16, drawn to a CDMA receiver, classified in class 375, subclass 147.
- III. Claim 17, drawn to a mobile CDMA system, which comprises a transmitter and a receiver, classified in class 370, subclass 342.

The inventions are distinct, each from the other because of the following reasons:

Inventions III and I, II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination evidence claims 17 does not set forth the details of the subcombination a method for transmitting CDMA code (claims 1-9) and a method for receiving CDMA code (claims 10-16) in a mobile system, and the subcombination has separate utility such as transmitter shown in fig. 2, the inventions are distinct and restriction is proper.

Furthermore, inventions I (transmitter, claims 1-9) and II (receiver, claims 10-16) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately

usable. In the instant case, invention transmitter (claims 1-9) has separate utility such as transmitter shown in fig. 2. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II and III restriction for examination purposes as indicated is proper.
